Introduction

I'm a Computer Science undergraduate curious about how things really work in the tech industry. I'm comfortable with C and Python, and I'm currently diving into web development by building projects from scratch. I'm looking for opportunities where I can apply what I know, learn from real challenges, and contribute to meaningful projects.

Education

B.Tech in Artificial Intelligence and Machine Learning,
(Bangalore Institute of Technology)

September 2025 - Present

- Currently pursuing undergraduate studies with a strong foundation in core AI/ML concepts.

Skills

- **Programming Languages:** C, Python, HTML CSS
- **Tools/Platforms:** GitHub & Git, Unity, JetBrains, PyGame
